Amirmohammad (Amir) Mohammadi|U.S. Permanent Resident

+1 (979) 436-5736 ● College Station, TX ● amir.mhm.ee@gmail.com ● Scholar ● LinkedIn ● Website

RESEARCH INTERESTS

Data Science, Machine Learning, Applied AI, Foundation Models, Deep Learning Architectures & Techniques, Computer Vision, Generative AI, Physics-Informed Machine Learning, Multi-Modal Learning, Efficient AI.

TECHNICAL SKILLS

Coding & Frameworks: Python, NumPy, Pandas, Matplotlib. PyTorch, Scikit-Learn, Hugging Face.
Development & Tools: VS Code, Jupyter Notebook, Git, Linux, High-Performance Computing.

EDUCATION

Texas A&M University, College Station, Texas — September 2022 - December 2026
Doctor of Philosophy in Computer Engineering
Thesis: Distribution-guided Parameter-efficient Fine-tuning of Foundation Models for Waveform-based Sensing

Sharif University of Technology, Tehran, Iran — September 2018 - February 2021
Master of Science in Electrical Engineering
Thesis: Design and Evaluation of an Integrated Biomedical System for Human Stress Detection and Monitoring

University of Tabriz, Tabriz, Iran — September 2014 - September 2018
Bachelor of Science in Electrical Engineering
Project: Development of a Data Logger for Motion Sensors with Python

EXPERIENCE

Texas A&M University, College Station, Texas — September 2022 – December 2026
Graduate Research Assistant

- **Developed** a distribution-aware method for parameter-efficient fine-tuning of Transformer foundation models for waveform-based sensing.
- **Built** a few-shot whole-slide image classification pipeline to investigate parameter-efficient fine-tuning of vision-language models to predict ethanol drinking status from liver histology.
- **Contributed** to an evaluation pipeline for image classification, semantic segmentation, and object detection, comparing pre-trained computer vision models and adaptation strategies.
- **Improved** the classification accuracy of a convolutional neural network by designing a time-frequency feature combination for acoustic applications.
- **Reduced** ground truth data requirements by a factor of 15 for physiological signals by developing physics-informed neural networks for cuffless blood pressure measurement.
- **Received** fully funded doctoral research assistantship support from MIT Lincoln Laboratory, the National Institutes of Health, and the Texas A&M Department of Electrical & Computer Engineering.
- **Disseminated** research findings through publications, presentations, and reports to funding agencies.

Sharif University of Technology, Tehran, Iran — July 2019 – February 2021
Graduate Student Researcher

- **Designed** an ECG + EDA wearable sensor with a 3× longer battery life compared to alternatives and delivered 94% mental stress detection accuracy across 18 participants using machine learning models.

ACADEMIC SERVICE, TEACHING & MENTORING

- Reviewer, IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP).
- Reviewer, Expert Systems with Applications.
- Session chair, IEEE International Geoscience and Remote Sensing Symposium (IGARSS).
- Delivered guest lectures in Machine Learning for Electrical Engineering at Texas A&M University.
- Showcased AI projects at Night at the Zach during the Texas Science & Engineering Fair.
- Mentored undergraduate and graduate students on end-to-end AI projects.
